NOVEL TREATMENT PARADIGMS BASED ON INNOVATIVE FEATURES

• Controlled Chaos Technology
  o The advantage of Controlled Chaos Technology is that it randomly delivers each micro-beam so a more natural look and uniform treatment is achieved
  o Prevents cross-thermal damage

• Dual Operating Modes
  o MOSAIC HP raises the standard by offering a choice between two convenient and easy to use operation modes: Users can freely switch between two modes during the same treatment and perform very accurate operations regardless of the size of the treatment area
  o Dynamic Mode: Customized to treat multi lesions or large area by steadily moving technique
  o Static Mode: Customized to treat any single lesion or small area by stamping technique

• High pulse energy, for low thermal damage and improved outcomes
• User-friendly treatment interface
• No consumables

Capture the Beauty in MOSAIC Fractional Regeneration

MOSAIC HP with Triplex Therapy is the first innovative erbium glass fractional laser system that has three operational modes: Normal Mode, Thermal Mode and Hair Mode. Users can treat various indications to achieve optimal clinical outcomes in a single system.

NORMAL MODE: Narrower pulse width

THERMAL MODE: Wider pulse width

HAIR MODE: MOSAIC HP enables hair regrowth through converting telogen phase into anagen phase. Safe and convenient therapy treatments are easy to perform and control depth. This procedure is comfortable for patients and maximizes scalp and follicle rejuvenation with little to no downtime.

APPLICATIONS:

- Rejuvenation
- Wrinkles & Skin Laxity
- Scars
  - Acne Scar, Surgical Scar, Traumatic Scar, Burn Scar
- Striae
- Photo-damaged Skin
  - Large Pore, Rough Skin Texture
- Uneven Skin Tone
- Hair Re-growth
  - Male Androgenetic Alopecia
  - Female Androgenetic Alopecia
  - Alopecia Areata
  - Alopecia Universalis

IMMEDIATELY AFTER
Separated but intact epidermis and altered collagen can be distinguished from the visibility of the MNC.

POST 3 DAYS
Epidermal repair and collagen remodeling continues.

POST 24 HOURS
Rapid re-epitheliazation.

REGENERATION PROCEDURE IN SKIN TISSUE

PULSE ENERGY 20 mJ

POST 14 DAYS
The epidermis has returned to its normal appearance and dermal repair continues.
